

## r17.4.11 Changelog

+-----+  
| r17.4.11 Release - 73764 |  
+-----+

Release day - 16th December 2020

## Bug

- [DSOF-15261] - d3 no longer reports "Uncompressed Renderstream license: unknown" when license is valid, in the right place and RSUC is working
- [DSOF-15578] - OmniCal: BundleAdjustment no longer uses more CPU threads than gx range has
- [DSOF-15591] - OmniCal: manual z-clipping is now applied correctly after alignment
- [DSOF-15597] - OmniCal: VimbaCamServer logging is now regularly flushed, stopping missing/incomplete messages in log file
- [DSOF-15605] - OmniCal: logging now includes stacktrace when rethrowing exceptions silently, so we can diagnose problems more easily.
